

## Located in Madrid

# Data Engineer (m/f/div)

## Your responsibilities

- Be part of the team responsible for the cross-company "Data Supply Chain" in the Otto Group to ensure the data supply of novel, data-driven business models.
- We want to significantly increase the usability and impact of our data platform for real-time and batch processing within the group - with your expertise!
- Together with your colleagues, you will be responsible for the design and implementation of our new, high-performance and robust BI platform in the Google Cloud for big, fast & smart data. 100% Cloud only.
- In addition to processing and preparing the data along its entire lifecycle in our data pipelines of data stream processing, you will also create tools & frameworks for the efficient use of the new BI platform.
- With a strong customer focus, we create the basis for all BI applications, a uniform understanding of data, transparency along the data processing and meet all legal and regulatory requirements. True Self-Service BI.

## Your qualifications

- Large amounts of data, their high-performance processing and technical innovations are your passion.
- You have excellent conceptual skills, a quick mind and enjoy working in a team.
- You are eager for knowledge and do not only want to develop software, but also to penetrate technical requirements and transform data into knowledge to inspire customers.
- Very good developer skills in Java and SQL as well as possibly first experiences with Scala or Python
- Confident handling of relational databases (e.g. BigQuery) and concepts of data warehousing and data modelling as well as initial knowledge of real-time technologies.
- Experience in the development of scalable cloud solutions based on AWS or Google (e.g. Terraform, Google Dataflow, etc.).
- Methodical approach: a clean object-oriented or functional design, tests and monitorability characterize your software. Clean build and deploy processes are important to you.

## We offer you these and other benefits

Agile
