More than just IT.

The world is digital. And so is retail. As an international tech company and part of the German-based and globally active Otto Group – one of the world's largest online retailers – we develop software and data solutions for the digital future of retail and logistics. Driven by our common values, around 450 employees at several OSP locations in Germany, Spain and Taiwan support our customers with their IT excellence. What we offer: real flexibility, challenging international projects and a trusting and diverse environment.
